

MASTER PROMPT

7-Day South Indian Eggetarian Meal Plan • Reusable AI Prompt

R — Role

Act as a 30+ female software professional and mindful-eating meal planner specializing in South Indian/Tamil Nadu eggetarian nutrition, balanced meals, protein, fibre, practical meal preparation and sustainable eating.

Create practical, home-style meals suitable for a busy working professional.

T — Task

Create a 7-day South Indian eggetarian meal plan from Monday to Sunday for:

Female, 30+

Weight: 70 kg

Height: 163 cm

Eggetarian: vegetarian + eggs; no meat/fish

Medium-spice preference

Working software professional

Focus: mindful eating, high fibre, adequate protein, vegetable and fruit variety.

Protein target: 84–98 g/day (~1.2–1.4 g/kg)

Use realistic portions and varied natural protein sources. Avoid excessive reliance on eggs, paneer or processed protein foods.

The final response must be a beautiful, professional, print-friendly PDF.

C — Context & Meal Rules

Daily structure

Every day must contain:

Breakfast → Mid-Morning → Lunch → Evening Snack → Light Dinner

Breakfast

Include protein + fibre + vegetables/fruit.

Suitable options include idli, dosa, adai, pesarattu, upma, millet dishes or uthappam with eggs, dal, curd or other natural protein sources.

Mid-Morning

Include whole fruit. Rotate seasonal fruits such as guava, papaya, banana, orange/mosambi, apple and pomegranate.

Lunch

Alternate between:

Traditional South Indian meal

Rice/millet

Sambar

2 separate vegetable sides

Rasam and/or curd

Additional protein if needed

One-pot meal

Vegetable egg rice

Millet pulao

Khichdi

Egg/vegetable biryani

Millet pongal

Mixed-dal rice

Important: Vegetables inside sambar must be explicitly identified and must not be counted as one of the two separate vegetable sides.

Evening Snack

Rotate options such as sundal, sprouts, roasted chana, corn, boiled eggs, fruit + nuts, curd or Greek yogurt.

Dinner

Keep dinner lighter than lunch while retaining protein and vegetables. Use options such as vegetable dosa, idli + sambar, adaï, pesarattu, millet dosa, light khichdi, vegetable soup + egg or an occasional tofu/paneer bowl.

F — Few-Shot Examples

Use these examples as structural guidance, not as meals to repeat throughout the week.

Breakfast:

2 pesarattu made from ~70 g raw green gram + 2 boiled eggs + tomato-onion chutney + 150 g curd.

Traditional Lunch:

1 cup cooked red rice + sambar containing drumstick, carrot, pumpkin and brinjal + $\frac{3}{4}$ cup beans poriyal + $\frac{3}{4}$ cup cabbage poriyal + rasam + 150 g curd.

One-Pot Lunch:

1½ cups cooked foxtail millet vegetable egg rice + 2 eggs + peas, carrot, beans and capsicum + cucumber-carrot raita.

Snack:

1 cup black-chana sundal + 1 small orange.

Light Dinner:

2 small ragi dosas + 1 cup moong-dal vegetable soup + 1 boiled egg + cucumber-tomato salad.

R — Response Requirements

Main table

Create a Monday–Sunday table with exactly these columns:

	Day		Breakfast		Mid-Morning		Lunch		Evening Snack		Dinner		Vegetables		Fruits		Approx. Protein	
--	-----	--	-----------	--	-------------	--	-------	--	---------------	--	--------	--	------------	--	--------	--	-----------------	--

For every day:

Explicitly list 5+ different vegetables.

Include 3 servings/kinds of whole fruit.

Target approximately 84–98 g protein.

Distribute protein across meals.

Include fibre-rich foods.

Give practical portions.

Clearly identify cooked/raw quantities where relevant.

Keep dinner lighter than lunch.

Use medium-spice, home-style South Indian food.

Avoid excessive repetition.

Prioritize seasonal and commonly available Tamil Nadu ingredients.

Quality Check

Before finalizing, verify each day individually for:

5+ different vegetables

3 whole-fruit servings/kinds

84–98 g approximate protein

Adequate fibre

Protein at multiple meals

Balanced carbohydrate portions

Variety of legumes, grains, vegetables and fruits

Practical preparation for a working professional

If any day fails, revise it before producing the final output.

PDF Design Requirements

Generate the final answer as a professional A4 PDF, preferably landscape for the meal tables.

Use a clean South Indian-inspired palette:

Deep green

Muted turmeric yellow

Terracotta

Cream/off-white

Use:

Clear typography

Dark green table headers

Alternating row colours

Good cell spacing

High contrast

Readable font sizes

Professional, minimal decoration

Do not shrink the text excessively to fit the entire table on one page. Split the table across multiple pages if necessary.

Suggested PDF structure

Page 1:

Title, profile, protein target and brief nutrition approach

Pages 2–3:

Monday–Sunday meal-plan tables

Page 4:

Weekly nutrition/quality summary

Page 5:

Weekly meal-prep guide + mindful-eating reminders + nutrition note

Weekly Meal-Prep Guide

Include a concise section covering:

Batch cooking sambar/dal

Pressure-cooking chana/green gram/other legumes

Preparing sundal portions

Boiling eggs

Washing and chopping vegetables

Preparing idli/dosa/adai/pesarattu batter

Cooking/portioning grains

Preparing fruit portions

Keeping curd/Greek yogurt ready

Quick workday backup meals

Mindful Eating Reminders

Include 4–5 practical reminders:

Eat slowly and pause midway through meals.

Start with the planned portion and add more if genuinely hungry.

Avoid eating continuously while working at the computer.

Use hunger/fullness cues instead of rigid restriction.

Prefer whole fruit over juice.

Nutrition Note

Include this statement at the end:

Protein needs are approximate and may vary with activity level, health status, dietary requirements and individual goals. The 84–98 g/day target is based on approximately 1.2–1.4 g/kg/day for a 70 kg adult. This meal plan is general nutrition guidance and is not a substitute for individualized advice from a qualified dietitian or healthcare professional.

Final Standard

The finished PDF should be nutritionally balanced, practical, visually polished, South Indian in style and easy to use during a busy workweek.

Do not create a crash diet or unnecessarily restrictive plan. Prioritize sustainable eating, variety, adequate protein, fibre and mindful eating.
